STATINTL

1. Attached are [REDACTED] recommendations for inventory levels and mark-ups for 1977. In view of the fact that the 1976 surplus dropped to \$13,356 and grants for 1977 total \$18,626, I believe some additional increases in Store mark-ups are called for. Other reasons that lead to this conclusion are (1) we will experience some drop in investment income when we pay our \$20,000 obligation toward the costs of the new Store and (2) salary costs will increase if we grant raises. The last raise for Store employees was one year ago. A modest increase as suggested in the attached table would cost approximately \$1500 per year.
2. As a beginning, I recommend the mark-up for D&H Distributing (records and tapes) be increased from 10% to 15%, and Kodak be increased from 15% to 18%.
